Workshop Summary

Dates: Tuesday 3rd – Wednesday 4th June, 2003

Venue: Conference Room of the Fisheries Division, Roseau, Dominica

N.b. The workshop contents and participant handouts are available as separate documents: "Dominica Participant's Workbook" and "Dominica Overheads and Handouts".

The workshop was originally scheduled to be held over three days (see Appendix 2) but was shortened *in situ* to two days because many participants had commitments for Thursday June 5th, World Environment Day. This meant that some sections of the workshop were rather rushed (particularly on the second day) and participants had less time to practise activities in working groups than would have been ideal.

The location and facilities provided by our hosts the Fisheries Division were very good, as was the standard of refreshments.

Overall, attendance was less than was hoped for. Around 25 invitations were sent out by FWD (see Appendix 1) but only 11 people attended. Some participants had a very relaxed view of time-keeping (e.g. only one turned up on time for the start of the workshop!) and some only attended a few sessions. Nevertheless all participants seemed enthusiastic and discussion, group and working sessions were lively and animated,. The overall response of participants to the workshop was very positive (see Participant Feedback below), and most felt that they would be able to put the skills learnt to good use.

Participant Feedback

At the end of the workshop an anonymous Workshop Evaluation Questionnaire was distributed to participants. Nine completed questionnaires were collected referred to as respondents a-i. Answers are summarized below, in the original questionnaire format.
